RADBLOK®
MOBILE ON - RADIATION OFF
ELECTROMAGNETIC INTERFERENCE SHIELDING CHIP

MOBILE RADIATION - EMR

- **Electromagnetic radiation (EMR)** is a form of energy emitted and absorbed by charged particles like Cell Phone.
- Various study reports across the world states that Electro-magnetic radiation is dangerous (Ref: Study reports) in many ways and may cause;
- …Infertility, Ear Tissue Problem, Alzheimer, High Irritation Levels, Nausea, Tiredness, Giddiness, Heart, Malfunctioning (Missing Beats), Brain Malfunctioning (Brain Waves Disorder), Hypertension (Collision of energies).
- Constant exposure will lead to Cancer, Brain Tumours, Heart Diseases and Many More Fatal Illness.
- It is observed that EMR has much adverse effect on kids, medically unfit, pregnant women and old people.

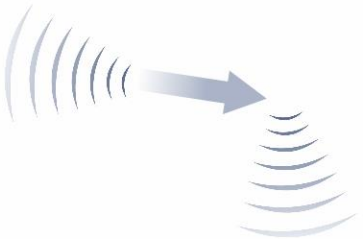
MOBILE RADIATION... HOW IT HAPPENS!

Caller :
Audio Signal to
Electric Signal.

Electric Signal to Tower
in the form of Microwaves
carried Radio waves

Tower generates radiations
and sends the microwaves
to its destination that is the
other mobile : Receiver



Mobile phone radiates as well as receives microwave radiation to which we are exposed, when we are in a conversation.

RADBLOK™
MOBILE ON - RADIATION OFF

Sapio Solutions Pty. Ltd.

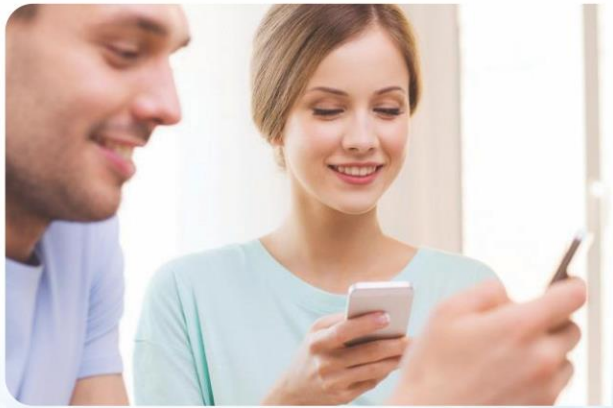
WE'VE MOVED FROM USING A MOBILE TO ABUSING IT



150 That's the number of times a day, an average person looks at a mobile

737 That's the number of minutes a month an average person talks in a mobile

USED FOR

- Chatting
- Calling
- Business Apps
- Personal Apps

RADBLOK™

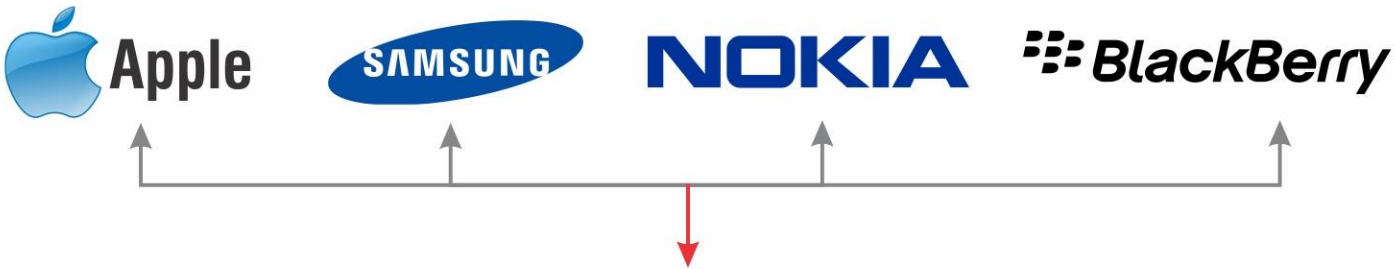
MANUFACTURER WARNINGS IGNORED



"Apple, doesn't want iPhones to come closer than 5/8 of an inch | Research In Motion, BlackBerry's manufacturer, is still more cautious: keep a distance of about an inch | Samsung & Nokia warrant a 3/4th of an inch distance"

The Federal Communications Commission mandates that the SAR produced by phones be no more than 1.6 watts per kilogram. One study listed by Mr. Henry Lai found effects like loss of memory in rats exposed to SAR values in the range of 0.0006 to 0.06 watts per kilogram. "I did not expect to see effects at low levels," he said.

FACTS ABOUT CELL PHONE SAFETY TESTS

- "Cellphone-safety tests **are based on the amount of radiation absorbed into the head of man who is in the top 10 per cent of U.S. military recruits**, a 200-pounder with an 11-pound brain standing at 6 feet, 2 inches.
- The standards were based on early analog phones used no more than six minutes at a time, not the digital | Smartphone models now in use.
- They were set to prevent the head from overheating. The tests don't account for the smaller head sizes of women and children."

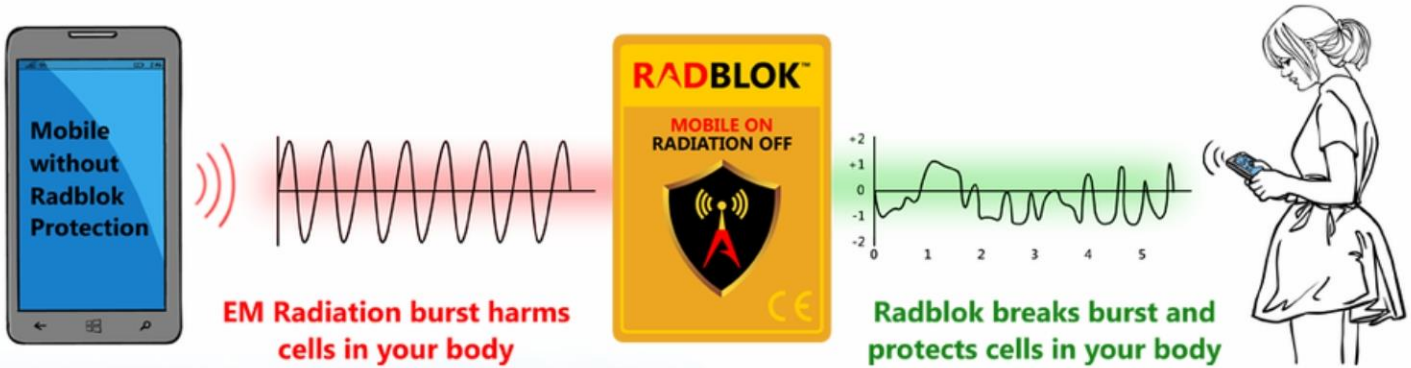
RAD BLOK
THE ANTI RADIATION PATCH

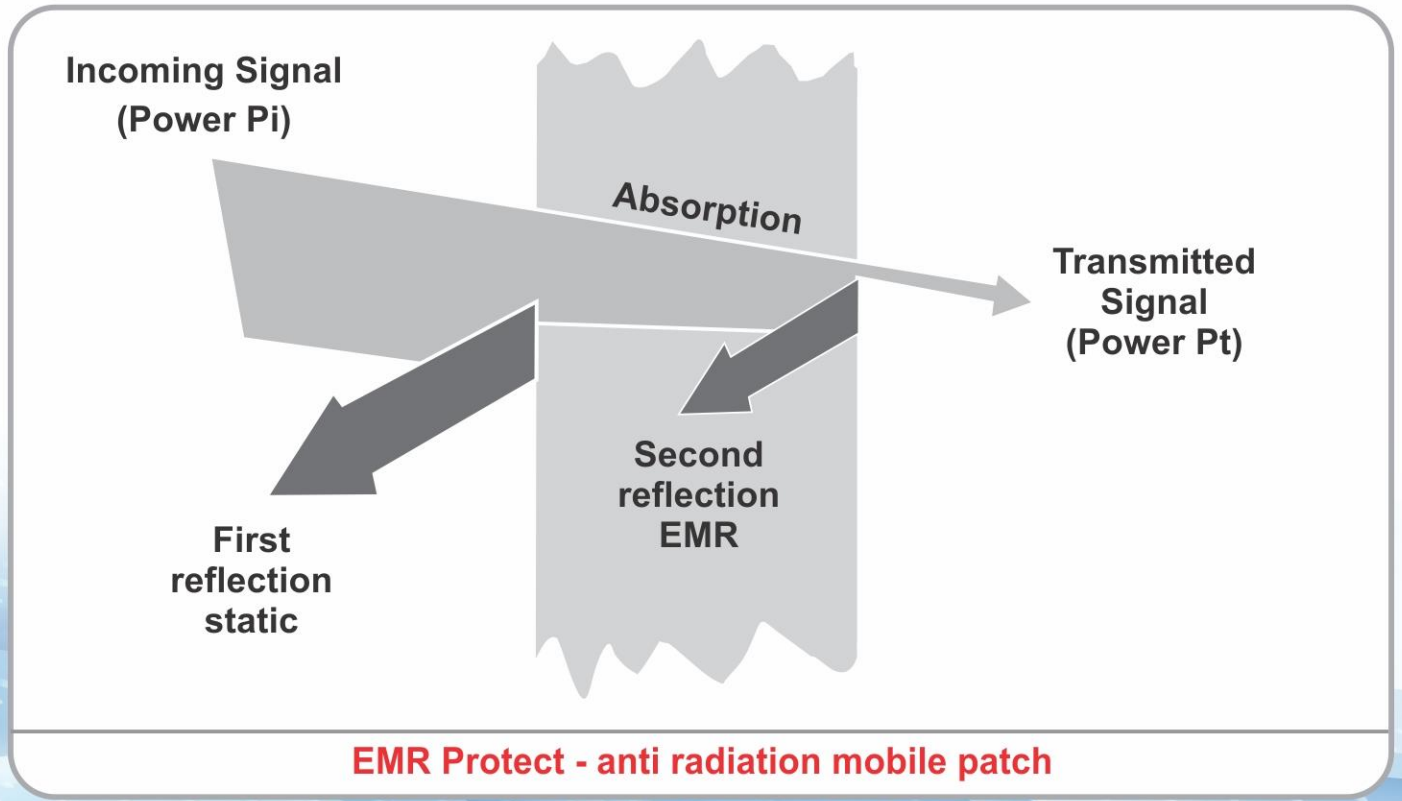
RADBLOK™
MOBILE ON - RADIATION OFF

Radblok – HOW IT WORKS



Every time you use your mobile it emits a strong, regular RF burst that can harm cells in your body. RadBlok's anti-EMR chip breaks that burst into a irregular intermittent pulse that weakens the radiation effect.

RADBLOK - ADD MORE LIFE TO HEALTH



EMR Protect - anti radiation mobile patch

RADBLOK - TECHNOLOGY

Imprinted with RADBLOK Proprietary Compounds

Aluminium

Gold

Nickel-
Chromium-Copper

Gold

Aluminium

The built in multiple layers of protection can effectively stop radiation from the cell phone by reflecting and decaying it to a greater extent.

The fibre used is made up radiation safe components like Nickel, Copper, Silver and Carbon and are 100% recyclable materials with no harmful chemicals.

Inner layer of RAD BLOK is strengthened with 24 Ct. Gold for an extended protection.

RAD BLOK is FDA, CSA compliant and all the materials used in Production are FDA CSA certified.

UNIQUENESS OF RADBLOK

- RadBlok is developed with patent pending technology by Maxwell EMR Research Center Pvt Ltd, a research driven enterprise engaged in the research, design, development and manufacture of anti radiation
- RadBlok neutralizes the harmful effects without disturbing cell phones function and operation.
- RadBlok is the only CE certified that exhibits its properties according to MIL Standards.
- The base material used is an absolute radiation resistant material made up of EMI mesh that is normally used in micro ovens to prevent emission and probable leakage of Harmful EMR.
- RadBlok is manufactured using 24 CARAT GOLD, the most electrically conductive of all metals that allow the signal waves to flow unimpeded. RadBlok with mesh Antenna Properties absorbs and grounds the electromagnetic frequency generated by the electronic signals waves.
- RadBlok acts as a signal filter and Signal repeater with an embeded layer of aluminium foil in the chip
- RadBlok effectively blocks EMF, EM Cloud, Static Cloud generated by electromagnetic waves in process of inducing power by communication systems in to atmosphere.

HOW TO USE RAD BLOK ?
ANTI RADIATION PATCH

- Choose a spot preferably closer to the antenna/ ear piece.
- Clean the outer surface of the cell phone or the Battery by removing the back cover.
- Peel paper from the back of the Patch and press it firmly.
